

# Unpacking the IRA: What it Means for Renewable Energies

## \$369B in Federal Funding to Support Energy and Climate Programs

The IRA provides at least a decade of certainty for the Investment Tax Credit (ITC), increases the base credit back to 30%, and provides new stackable bonus credits for certain projects. Partnering with PosiGen will help you be well-positioned to benefit from this program.

**10% Adder**

### Low-Income Communities Credit

Credit added for energy projects installed in low-income census tracts. Annual Program size of 1.8GW/y\*

**10% Adder**

### Energy Communities Credit

Credit added for energy projects installed at brownfield sites, in areas with recently closed coal mines or coal-fired power plants, or areas that have been dependent on the fossil fuel industry for jobs and have high unemployment.

**10% Adder**

### Domestic Content Credit

Credit added if 40% or more of the total costs of manufactured products included in the system are made in the U.S.A.
